

MAKE YOUR WATER GO FARTHER

SUPERNET MICRO-SPRINKLERS FOR YOUR STRAWBERRIES

ANOTHER TOOL FOR YOUR IPM PROGRAM FOR BOTH CONVENTIONAL & ORGANIC STRAWBERRY PRODUCTION

LOW VOLUME

Lower flow rate/acre reduces runoff

LOWER ENERGY

Get a 35% - 40% reduction* in pumping power - energy rebates may apply

DUST CONTROL

Apply water to minimize dust damage

MITE SUPPRESSION

Helps keep optimum conditions for Persimilis mites

TRANSPLANT ESTABLISHMENT

Maintains moisture where it counts

EASY HARVESTING & SPRAYING

Sprinklers can be left in the field from transplant through harvest

REDUCE PIPE COSTS

Reduce rental and storage costs for aluminum pipe

REDUCE LABOR

Reduce weeding; less heavy lifting; reduce movement of aluminum pipe in and out of the field*

NETAFIM SUPERNET MICRO-SPRINKLERS

Pressure regulated sprinklers maintain uniform flow across a broad range of pressures.

- Large water passage resists clogging
- Drop down bug-proof plate prevents entry of insects
- Everspin bearing promotes long lasting performance
- Self-flushing diaphragm

WE'LL TELL HOW YOU CAN START SAVING WHILE IMPROVING YOUR STRAWBERRY PRODUCTION BY USING NETAFIM SUPERNET MICRO-SPRINKLERS
